

IBM Case Manager: Solution Deployment from Design to Production (V5.3.2)

This course is designed to show you how to migrate and deploy Case Manager solutions from development to preproduction and production. Participants use a system with two instances of IBM Case Manager to practice the skills that are required by solution builders and administrators to migrate and deploy solutions from one environment to another.

This course is also available as an SPVC (course code: F2939G) with instructional content, as well as a lab environment where students can work through demonstrations and exercises at their own pace.

Recommended Delivery Method: Instructor-led/SPVC

Recommended Duration: 6 hours

Intended Audience

This course is for administrators, and solution builders who are involved in Case Manager solution deployment from one environment to another.
